This memo confirms our telephone notification of the subject prompt notification reportable occurrence made Friday, November 2, 1979, to Mr. J. A. Dyer of your office as follows:

OCCURRENCE - On Thursday, November 1, 1979, we received notification from our NSSS vendor that an error had been discovered in the input data for our current ECCS analysis for Units 3 and 4. Correction of this error resulted in a reduction of the allowable Fq limit associated with steam generator tube plugging $\leq 22\%$ to a value of 1.90.

CORRECTIVE ACTION - Current operation within the reduced Fq limit was confirmed for both units. Augmented surveillance or power limits will be applied in accordance with technical specification requirements based on the reduced Fq limit.

J. K. Hays
