Mr. James P. O'Reilly, Director, Region II
Office of Inspection and Enforcement
U. S. Nuclear Regulatory Commission
101 Marietta Street, Suite 3100
Atlanta, Georgia 30303

Dear Mr. O'Reilly:

Re: RII:JPO
Docket Nos. 50-250, 50-251
IE Bulletin 80-04

This letter is an update on our May 8, 1980 response to IE Bulletin 80-04 (FPL letter, L-80-148). In Item 3 of that report, we stated that we would contract with our NSSS vendor to perform an evaluation of the effect of Auxiliary Feedwater (AFW) runout during a main steam line break (MSLB) on containment pressure. This effort is still in progress, but we expect the results of the analysis from our NSSS vendor in the near future. We will review the results and submit our final response to the Bulletin by October 1, 1980.

Very truly yours,

Robert E. Uhrig
Vice President
Advanced Systems & Technology
