Office of Nuclear Reactor Regulation
Attention: Mr. Darrell G. Eisenhut, Director
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Eisenhut:

Re: Turkey Point Units 3 & 4
Docket Nos. 50-250 and 50-251
Adequacy of Station Distribution System Voltages

Reference 1: NRC letter to FPL dated August 19, 1980 from Chief
Operating Reactors Branch #1, Division of Licensing.

Reference 2: NRC letter to FPL dated August 18, 1980 from Assistant
Director for Operating Reactors, Division of Licensing.

In order to respond to the NRC letter (Reference 1) requesting additional information on the adequacy of station electrical distribution system voltages, we have contracted with our Architect-Engineer to provide information necessary for our reply. We expect to receive this information by late October 1980. We will review this information and prepare our response to Reference 1 by November 1, 1980. Because this report will effect our response to the questions in Reference 2, we will prepare that report following our review of the information prepared by our Architect-Engineer for Reference 1. Following this review, we will also be able to prepare Technical Specification changes, which will then require six to eight weeks for processing. We will provide a response to Reference 2 and an update on our progress with the Technical Specification changes by November 15, 1980.

Very truly yours,

Robert E. Uhrig
Vice President
Advanced Systems & Technology
