Re: Florida Power & Light Company (Turkey Point
Nuclear Generating Units Nos. 3 and 4 -
Docket Nos. 50-250-SP, 50-251-SP

Dear Mr. Saunders:

I received today, from the NRC Staff, a copy of the Motion For Leave To Participate which you recently filed with the Atomic Safety and Licensing Board in the captioned proceedings. The motion is undated, and contains no service list.

As you know, this firm is counsel of record for the licensee, Florida Power & Light Company. Enclosed is a copy of the most current service list for your files. 10 CFR § 2.701(b) provides that:

"All documents offered for filing shall be accompanied by proof of service upon all parties to the proceeding or their attorneys of record as required by law or by rule or order of the Commission. The staff of the Commission shall be deemed to be a party."

Your motion refers to a resolution adopted by the Board of County Commissioners of Dade County and indicates "said resolution being attached hereto and made a part hereof". No resolution was attached to the copy of the motion served upon me by the NRC Staff.

Docket Nos. 50-250-SP
50-251-SP

October 27, 1980

ORDER RELATIVE TO METROPOLITAN
DADE COUNTY'S PETITION TO PARTICIPATE
UNDER 10 CFR §2.715(c)

On October 7, 1980, Metropolitan Dade County, Florida filed a motion for leave to participate in this proceeding under 10 CFR §2.715(c). A resolution of the Board of County Commissioners, dated September 2, 1980 authorizing such action was attached to the motion. Turkey Point Nuclear Generating Units Nos. 3 and 4 are located in Dade County. Neither the motion nor the resolution refers to the extreme tardiness of the petition nor is any reason given for the action of the county commissioners at this late date other than to state their issues of interest.

Florida Power & Light did not respond to the motion. The NRC Staff filed in support of the motion on October 7, 1980.

Based on the Commission Memorandum and Order in West Valley concerning the late intervention of Erie County, New York, whose tardiness lacked merit, we grant the motion and accept Metropolitan

Dade County under 10 CFR §2.715(c) in this proceeding.^{*/} The County must accept the proceeding at its present status. All filings and orders to date are located in the local document room--Library of Environmental and Urban Affairs, Florida International University, Miami, Florida.

IT IS SO ORDERED.

FOR THE ATOMIC SAFETY AND
LICENSING BOARD

Elizabeth S. Bowers
Elizabeth S. Bowers, Chairman

Dated at Bethesda, Maryland
this 27th day of October 1980.

FLORIDA POWER & LIGHT COMPANY

Docket Nos. 50-250-SP
50-251-SP

(Turkey Point Nuclear Generating
Unit Nos. 3 and 4)

MOTION FOR LEAVE TO PARTICIPATE
PURSUANT TO RULE 2.715(c)
OF THE UNITED STATES
NUCLEAR REGULATORY COMMISSION
RULES AND REGULATIONS,
RULES OF PRACTICE FOR
DOMESTIC LICENSING PROCEEDINGS

Petitioner, METROPOLITAN DADE COUNTY, a political subdivision of the State of Florida, by and through its undersigned counsel, hereby files this Motion for Leave to Participate Pursuant to Rule 2.715(c) before this Honorable Board, and alleges as grounds therefor, the following:

1. On September 2, 1980, the Board of County Commissioners of Dade County unanimously adopted a resolution directing the County Attorney's Office to petition the Atomic Safety and Licensing Board for leave to participate pursuant to Rule 2.715(c), said resolution being attached hereto and made a part hereof.

2. Rule 2.715(c) provides in pertinent part that an agency such as Dade County shall have a "a reasonable opportunity to participate and to introduce evidence, interrogate witnesses, and advise the commission without requiring the representative to take a position with respect to the issue. Such participants may also file proposed findings and exceptions pursuant to Sections 2.754 and 2.762 and petitions for review by the commission pursuant to Section 2.786".

3. Review of the Environmental Impact Appraisal by the Office of Nuclear Reactor Regulation and the Safety Evaluation by the Office of Nuclear Reactor Regulation, and amendments thereto, and review of the Environmental Impact Statement is likely to reveal areas of unique concern to petitioner. Petitioner would reserve its right to raise issues upon review of said documents.

WHEREFORE, your Petitioner, METROPOLITAN DADE COUNTY, respectfully requests that this Board permit petitioner to participate in all hearings in reference to the repairs at the Turkey Point Nuclear Generating Unit Nos. 3 and 4, as provided. in Rules of Practice for Domestic Licensing Proceedings, 2.715(c).

FLORIDA POWER AND LIGHT COMPANY
(Turkey Point Plant, Unit Nos. 3
and 4)

)
)
)
)

Docket Nos. 50-250
and 50-251

REVISED ORDER FOR MODIFICATION OF LICENSE

I.

The Florida Power and Light Company (the licensee) is the holder of Facility Operating License Nos. DPR-31 and DPR-41, which authorize the operation of the Turkey Point Plant, Unit Nos. 3 and 4 at steady state reactor power levels not in excess of 2200 megawatts thermal (rated power). Each facility consists of a pressurized water reactor located at the licensee's site in Dade County near Miami, Florida.

II.

On November 4, 1977, the Union of Concerned Scientists (UCS) filed with the Commission a "Petition for Emergency and Remedial Relief." The petition sought action in two areas: fire protection for electrical cables, and environmental qualification of electrical components. By Memorandum and Order dated April 13, 1978 (7 NRC 400), the Commission denied certain aspects of the petition and, with respect to other aspects, ordered the NRC staff to take several related actions. UCS filed a Petition for Reconsideration on May 2, 1978. By Memorandum and Order, dated May 23, 1980, the Commission reaffirmed its April 13, 1978 decision

regarding the possible shutdown of operating reactors. However, the Commission's May 23, 1980 decision directed licensees and the NRC staff to undertake certain actions.

With respect to environmental qualification of safety-related electrical equipment, the Commission determined that the provisions of the two staff documents - the Division of Operating Reactors "Guidelines for Evaluating Environmental Qualification of Class 1E Electrical Equipment in Operating Reactors" (DOR Guidelines) and NUREG-0588, "Interim Staff Position on Environmental Qualification of Safety-Related Electrical Equipment," December 1979 "form the requirements which licensees and applicants must meet in order to satisfy those aspects of 10 CFR Part 50, Appendix A General Design Criterion (GDC-4), which relate to environmental qualification of safety-related electrical equipment." The Commission directed, for replacement parts in operating plants, "unless there are sound reasons to the contrary, the 1974 standard in NUREG-0588 will apply." The Commission also directed the staff to complete its review of the information sought from licensees by Bulletin 79-01B¹ and to complete its review of environmental qualification of safety-related electrical equipment in all operating plants, including the publication of Safety Evaluation Reports, by February 1, 1981. The Commission

¹ Bulletin 79-01B was not sent to licensees for plants under review as part of the staff's Systematic Evaluation Program. The information sought by Bulletin 79-01B was requested from these licensees by a series of letters and meetings during the months of February and March, 1980.

imposed a deadline that, "by no later than June 30, 1982 all safety-related electrical equipment in all operating plants shall be qualified to the DOR Guidelines or NUREG-0588." The Commission requested the staff to, "keep the Commission and the public apprised of any further findings of incomplete environmental qualification of safety-related electrical equipment, along with corrective actions taken or planned," and requested the staff to provide bi-monthly progress reports to the Commission.

The Commission further directed the staff to add certain documentation requirements to each license after the specific requirements were approved by the Commission. The Commission also pointed out that the various deadlines imposed in its Order, "do not excuse a licensee from the obligation to modify or replace inadequate equipment promptly."

III.

The information developed during this proceeding emphasizes the importance of adequate documentation, the prompt completion of the review of environmental qualification of safety-related electrical equipment, and the prompt completion of any plant modification needed to assure conformance with the DOR Guidelines or NUREG-0588. A significant aspect of this review is the timely submittal of environmental qualification information by the operating plant licensees to enable the staff to complete its review in accordance with the Commission's Order. The staff has a program presently underway to reevaluate, using the DOR Guidelines and NUREG-0588, the qualifications of safety-related electrical equipment exposed

to environments that may exist following postulated accidents. These accidents are Loss of Coolant Accident and Main Steam Line Break inside containment, and High Energy Line Breaks inside and outside containment.

In this connection the licensee was requested by I&E Bulletin 79-018 of January 14, 1980 to provide a detailed review of the environmental qualification of Class 1E electrical equipment. This review was to include all equipment required to function under postulated accident conditions, both inside and outside the primary containment, and recognize all conditions specified in the bulletin. Evidence of qualification together with methods and justification, was requested.

Clarification was provided by supplemental information, briefings, and in some cases, meetings with the licensee. Timely completion of the staff's review of environmental qualification of electrical equipment and timely completion of needed modifications by the licensee is required to provide continuing reasonable assurance of public health and safety. Such completion is dependent on the prompt receipt of a complete response by the licensee to the staff's requests for information. However, the licensee's response, to date, is incomplete.

Therefore, I have concluded that the public health, safety, and interest require that a firm schedule for the timely submission of all the information previously requested by the staff should be established by Order effective immediately.

IV.

Accordingly, pursuant to the Atomic Energy Act of 1954, as amended, and the Commission's regulations in 10 CFR Parts 2 and 50, IT IS ORDERED THAT EFFECTIVE IMMEDIATELY Facility Operating License Nos. DPR-31 and DPR-41 are hereby amended to add the following provisions:

"Information which fully and completely responds to the staff's request as specified in I & E Bulletin 79-01B, shall be submitted to the Director, Region II, Office of Inspection and Enforcement, by the licensee, not later than November 1, 1980."

An earlier response is encouraged to facilitate staff review and issuance of the safety evaluation report. The licensee or any person whose interest may be affected by this Order may request a hearing within 20 days of the date of publication of this Revised Order in the Federal Register. Any request for a hearing will not stay the effective date of this Order. Any request for a hearing shall be addressed to the Director, Office of Nuclear Reactor Regulation, U. S. Nuclear Regulatory Commission, Washington, D. C. 20555. A copy of the request should also be sent to the Executive Legal Director, U. S. Nuclear Regulatory Commission, Washington, D. C. 20555, and to Mr. Robert Lowenstein, Esquire, Lowenstein, Newman, Reis and Axelrad, 1025 Connecticut Avenue, N.W., Suite 1214, Washington, D. C. 20036, attorney for the licensee.

If a hearing is held concerning this Order, the issue to be considered at the hearing shall be whether the licenses should be modified to require submission of information as set forth in Section IV. of the Order.

Operating of the facilities on terms consistent with this Order is not stayed by the pendency of any proceedings on the Order. This Order revises, in its entirety, the Order issued August 29, 1980, and published in the Federal Register September 11, 1980, (45 FR 60057).
