IN REPLY REFER TO:

January 21, 1981

Mr. Steven A. Varga  
Chief, Operating Reactors Branch #1  
Division of Licensing  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Varga:

I am replying to your request of December 18, 1980 to the Federal Energy Regulatory Commission for comments on the Draft Environmental Impact Statement related to steam generator repair at the Turkey Point Plant - Units 3 and 4. This Draft EIS has been reviewed by appropriate FERC staff components upon whose evaluation this response is based.

This staff concentrates its review of other agencies' environmental impact statements basically on those areas of the electric power, natural gas, and oil pipeline industries for which the Commission has jurisdiction by law, or where staff has special expertise in evaluating environmental impacts involved with the proposed action. It does not appear that there would be any significant impacts in these areas of concern nor serious conflicts with this agency's responsibilities should this action be undertaken.

Thank you for the opportunity to review this statement.

Sincerely,

Jack M. Heinemann  
Advisor on Environmental Quality

A black and white photograph showing a large, dense crowd of people, primarily men, standing in an open field. The individuals are scattered throughout the frame, with some looking directly at the camera and others looking away. The background is a light, hazy sky. The overall composition suggests a large gathering or assembly.
