Office of Nuclear Reactor Regulation
Attention: Mr. Darrell G. Eisenhut, Director
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Eisenhut:

Re: Turkey Point Units 3 & 4
Docket Nos. 50-250 and 50-251
Post-TMI Requirements

NUREG 0737 contained Item II.B.4, Training for Mitigating Core Damage. In our response to NUREG 0737, we stated that we were developing the required training program. We also committed to meet the NUREG implementation schedule. The purpose of this letter is to provide our program description and implementation schedule.

Florida Power & Light has contracted with the Westinghouse Electric Corporation for their On-site Mitigating Core Damage Course. It is our opinion that this course by our NSSS vendor will fully meet the intent of the requirements of NUREG 0737. Because the course description is considered proprietary information by the vendor, the course description is not included with this letter. It is, however, available for review at the plant site. Our present contract calls for the class to be presented to a portion of the required personnel with an option to obtain the presentation materials in order for the FPL training staff to present the instruction to the remaining personnel.

The first class was ordered prior to April 1, 1981 and the training for the personnel listed in NUREG 0737 will be completed by October 1, 1981. The Westinghouse presentation portion of the training is scheduled for July 13-17, 1981 in order to fit into the operator's training schedule.

Very truly yours,

Robert E. Uhrig
Vice President
Advanced Systems and Technology
