Docketing and Service Section
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Dear Commission Members,

Acknowledged by card...5-8-81...erp

I hope this letter finds you well and protecting the interests of the people (not the corporations). Unfortunately my husband and I are unable to attend the June hearing but we would appreciate your reading this letter into the hearing record.

We are both deeply concerned about the dangers and thoughtless procedures involved in the Florida Power and Light nuclear processes. From the beginning we feel they have been reckless and irresponsible in all aspects of their nuclearwork (except of course their P.R. division). They have proven over and over again that they are interested in profit and not safety. The Turkey Point Power Plant is a frightening symbol of their profit crazed effort to increase their profits at the expense of the consumers health and well being. We would hope, given the horrible safety record and dismal state of repair of the Turkey Point Power Plant, that the commission would insist on closing the plant down and refusing permission to work on any new plants. The alternative energy sources in S. Florida are abundant and I'm sure if Florida Power and Light would put their corporate minds to it, they would find a way of making money and providing us with a safe and renewable source of energy.

We are keeping our electricity consumption down, we've invested in solar water heaters and natural gas. We are willing to do whatever we need to in order to insure a safe future for our children and our community. Please don't let Florida Power and Light continue to exploit our people and endanger our health.

18105120430

Thanks Very Much,

H

Beryl Solla and Jim Yates
