1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

2. The second step is to gather relevant information and data. This can involve research, consultation with experts, or collecting data from various sources.

3. The third step is to analyze the information and data collected. This involves identifying patterns, trends, and relationships that can help in understanding the problem.

4. The fourth step is to develop a solution or answer. This involves applying the knowledge and skills gained from the previous steps to create a plan or strategy that addresses the problem.

5. The fifth step is to implement the solution and evaluate the results. This involves putting the plan into action and monitoring the progress to ensure that the problem is solved effectively.

Office of Nuclear Reactor Regulation
 Attention: Mr. Darrell G. Eisenhut, Director
 Division of Licensing
 U. S. Nuclear Regulatory Commission
 Washington, D. C. 20555

July 28, 1981
 L-81-323

Dear Mr. Eisenhut:

Re: Turkey Point Units 3 & 4
 Docket No. 50-250 & 50-251
Fire Protection Modifications

In accordance with 10 CFR 50.48 (d), Florida Power & Light Company will require an extension in the schedule for completing the following fire protection modifications at Turkey Point Units 3 and 4. Letter L-81-51, dated February 13, 1981 requested previously scheduled extensions for Turkey Point Units 3 & 4. In that request we described procurement problems being experienced with the Emergency Diesel Generator Tank Isolation Valves (SER Item 3.1.15), and rescheduled completion to August 2, 1981.

We are now in receipt of two of the four required valves. However, continuing procurement problems have caused the delivery date of the remaining valves to slip to September 1, 1981, with completion scheduled prior to November 1, 1981. Adequate protection is provided for the reasons discussed in Section 8.5.3.13 of the evaluation transmitted by our letter of February 25, 1977 (L-77-57). Additionally, frequent patrols by guard force and operations personnel would detect any off-normal condition of the type for which FPL is providing the modifications.

The fire protection modifications already complete provide reasonable assurance that public health and safety is properly protected. The completion schedule discussed above is a reasonable estimate of the time required to complete the remaining modification. Adequate alternate protection is afforded pending completion of these items.

Very truly yours,

A handwritten signature in cursive script that reads "Robert E. Uhrig".

Robert E. Uhrig
 Vice President
 Advanced Systems & Technology
