On the other hand, the results of the present study suggest that the use of a single, standardized, and validated questionnaire is a more efficient and reliable method for assessing the prevalence of mental health problems in a community sample. The use of a single questionnaire also allows for the collection of a large amount of data, which can be used to identify the prevalence of a wide range of mental health problems. The use of a single questionnaire also allows for the collection of data on a wide range of factors that are associated with mental health problems, such as demographic factors, social factors, and environmental factors. The use of a single questionnaire also allows for the collection of data on a wide range of mental health problems, such as depression, anxiety, and substance use. The use of a single questionnaire also allows for the collection of data on a wide range of factors that are associated with mental health problems, such as demographic factors, social factors, and environmental factors.

Office of Nuclear Reactor Regulation  
Attention: Mr. S. A. Varga, Chief  
Operating Reactors Branch #1  
Division of Operating Reactors  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Dear Mr. Varga:

Re: Turkey Point Units 3 & 4  
Docket Nos. 50-250 & 50-251  
Steam Generator Repair Special License  
Conditions - Channelhead Decontamination

As required by Section I.(g) of DPR-31, the Turkey Point Unit 3 Operating License, and as discussed with your staff, the following generic channelhead decontamination procedures have been provided to the NRC Resident Inspector:

- 1) Procedure #MRS 2.2.2 GEN-15, dated June 30, 1981  
(Steam Generator Channelhead Decontamination Using Alumina Grit and Water).
- 2) Change No. 1 to above Procedure #MSR 2.2.2 GEN-15,  
dated July 6, 1981.

The site specific procedures for Turkey Point are being developed and will be issued by Westinghouse in the near future. The final procedures will also be made available to the NRC Resident Inspector.

Our present construction schedule requires that the channelhead decontamination work begin on August 17, 1981.

Very truly yours,

A handwritten signature in dark ink, appearing to read "Robert E. Uhrig". The signature is fluid and cursive, with a large, sweeping "R" and "U".

Robert E. Uhrig  
Vice President  
Advanced Systems & Technology
