WITHHOLD ATTACHMENT 3 FROM PUBLIC DISCLOSURE

Office of Nuclear Reactor Regulation
Attention: Mr. Darrell G. Eisenhut, Director
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Eisenhut:

Re: Turkey Point Units 3 & 4
Docket Nos. 50-250 & 50-251
Proposed License Amendments
Base Load and Radial Burndown

In accordance with 10 CFR 50.90, Florida Power & Light Company submits herewith three (3) signed originals and forty (40) copies of a request to amend Appendix A of Facility Operating Licenses DPR-31 and DPR-41. These pages will supersede pages with the same number submitted via L-81-198, dated May 11, 1981. The remainder of that submittal remains applicable.

The proposed amendment is described below and shown on the accompanying pages bearing the date of this letter in the lower right hand corner. These amendments are in response to the request of Mr. M. Dunenfeld of your staff for additional information on the Mini-Incore Distribution Surveillance System (MIDS), and additional clarification regarding the basis of the engineering uncertainty factor.

Pages 3.2-3, 3.2-3a, 3.2-3b, 3.2-3c and 3.2-4

The specification regarding Augmented Surveillance was revised to include provisions for use of the MIDS under certain conditions of operation.

Figure 3.2-3

The peaking factor nomenclature in the Figure is changed to that now in use.

Page 6-22

A requirement for reporting Peaking Factor Limits is added.

8112010329 811123
PDR ADOCK 05000250
PDR

Pages B3.2-4, B3.2-8 and B3.2-8a

A description of the measurement of F_Q utilizing the MIDS is expanded and clarified.

Please note that our response contains information considered to be proprietary by the Westinghouse Electric Corporation. In conformance with 10 CFR 2.790, we are also forwarding an application for withholding information from public disclosure (Attachment 1) and an Affidavit (Attachment 2), setting forth the basis on which the proprietary information contained in Attachment 3 may be withheld from public disclosure by the Commission.

Attachment 3 contains a Safety Evaluation supporting the proposed Technical Specification changes.

The proposed amendment has been reviewed by the Turkey Point Plant Nuclear Safety Committee and the Florida Power & Light Company Nuclear Review Board. As this submittal supplements, at NRC request, our earlier Proposed License Amendments (L-81-198) of May 11, 1981, no fee is transmitted.

Very truly yours,

Robert E. Uhrig
Vice President
Advanced Systems & Technology

AFFIDAVIT

COMMONWEALTH OF PENNSYLVANIA:

SS

COUNTY OF ALLEGHENY:

Before me, the undersigned authority, personally appeared Robert A. Wieseemann, who, being by me duly sworn according to law, deposes and says that he is authorized to execute this Affidavit on behalf of Westinghouse Electric Corporation ("Westinghouse") and that the averments of fact set forth in this Affidavit are true and correct to the best of his knowledge, information, and belief:

Robert A. Wieseemann, Manager

Licensing Programs

Sworn to and subscribed
before me this 12th day
of May 1976.

Notary Public

GENEVIEVE KISH, NOTARY PUBLIC
MONROEVILLE BOROUGH
ALLEGHENY COUNTY
MY COMMISSION EXPIRES JULY 22, 1976

Handwritten marks and scribbles in the top right corner.

- (1) I am Manager, Licensing Programs, in the Pressurized Water Reactor Systems Division, of Westinghouse Electric Corporation and as such, I have been specifically delegated the function of reviewing the proprietary information sought to be withheld from public disclosure in connection with nuclear power plant licensing or rule-making proceedings, and am authorized to apply for its withholding on behalf of the Westinghouse Water Reactor Divisions.
- (2) I am making this Affidavit in conformance with the provisions of 10 CFR Section 2.790 of the Commission's regulations and in conjunction with the Westinghouse application for withholding accompanying this Affidavit.
- (3) I have personal knowledge of the criteria and procedures utilized by Westinghouse Nuclear Energy Systems in designating information as a trade secret, privileged or as confidential commercial or financial information.
- (4) Pursuant to the provisions of paragraph (b)(4) of Section 2.790 of the Commission's regulations, the following is furnished for consideration by the Commission in determining whether the information sought to be withheld from public disclosure should be withheld.
 - (i) The information sought to be withheld from public disclosure is owned and has been held in confidence by Westinghouse.

10-10-10

(ii). The information is of a type customarily held in confidence by Westinghouse and not customarily disclosed to the public. Westinghouse has a rational basis for determining the types of information customarily held in confidence by it and, in that connection, utilizes a system to determine when and whether to hold certain types of information in confidence. The application of that system and the substance of that system constitutes Westinghouse policy and provides the rational basis required.

Under that system, information is held in confidence if it falls in one or more of several types, the release of which might result in the loss of an existing or potential competitive advantage, as follows:

- (a) The information reveals the distinguishing aspects of a process (or component, structure, tool, method, etc.) where prevention of its use by any of Westinghouse's competitors without license from Westinghouse constitutes a competitive economic advantage over other companies.
- (b) It consists of supporting data, including test data, relative to a process (or component, structure, tool, method, etc.), the application of which data secures a competitive economic advantage, e.g., by optimization or improved marketability.

- (c) Its use by a competitor would reduce his expenditure of resources or improve his competitive position in the design, manufacture, shipment, installation, assurance of quality, or licensing a similar product.
- (d) It reveals cost or price information, production capacities, budget levels, or commercial strategies of Westinghouse, its customers or suppliers.
- (e) It reveals aspects of past, present, or future Westinghouse or customer funded development plans and programs of potential commercial value to Westinghouse.
- (f) It contains patentable ideas, for which patent protection may be desirable.
- (g) It is not the property of Westinghouse, but must be treated as proprietary by Westinghouse according to agreements with the owner.

There are sound policy reasons behind the Westinghouse system which include the following:

- (a) The use of such information by Westinghouse gives Westinghouse a competitive advantage over its competitors. It is, therefore, withheld from disclosure to protect the Westinghouse competitive position.

- (b) It is information which is marketable in many ways. The extent to which such information is available to competitors diminishes the Westinghouse ability to sell products and services involving the use of the information.
- (c) Use by our competitor would put Westinghouse at a competitive disadvantage by reducing his expenditure of resources at our expense.
- (d) Each component of proprietary information pertinent to a particular competitive advantage is potentially as valuable as the total competitive advantage. If competitors acquire components of proprietary information, any one component may be the key to the entire puzzle, thereby depriving Westinghouse of a competitive advantage.
- (e) Unrestricted disclosure would jeopardize the position of prominence of Westinghouse in the world market, and thereby give a market advantage to the competition in those countries.
- (f) The Westinghouse capacity to invest corporate assets in research and development depends upon the success in obtaining and maintaining a competitive advantage.

- (iii) The information is being transmitted to the Commission in confidence and, under the provisions of 10 CFR Section 2.790, it is to be received in confidence by the Commission.
- (iv) The information is not available in public sources to the best of our knowledge and belief.
- (v) The proprietary information sought to be withheld in this submittal is that which is appropriately marked in Attachment II to Commonwealth Edison Company letter, Pliml to Purple dated May 4, 1976, concerning reload safety and licensing. This information is being provided in support of a reload review of Commonwealth Edison's Zion Station Unit 1, plant for cycle 2 operation. This information is required per NRC Branch Technical Position CPB 4.3-1 "Westinghouse Constant Axial Offset Control (CAOC)" since the applicant proposes cycle 2 CAOC operation for $F_Q = 2.25$.

This information enables Westinghouse to:

- (a) Justify the design basis for the fuel
- (b) Assist its customers to obtain licenses
- (c) Meet warranties

Further, this information has substantial commercial value as follows:

- (a) Westinghouse sells the use of the information to its customers for purposes of meeting NRC requirements for licensing documentation.

- (b) Westinghouse uses the information to perform and justify analyses which are sold to customers.
- (c) Westinghouse uses the information to sell nuclear fuel and related services to its customers.

Public disclosure of this information is likely to cause substantial harm to the competitive position of Westinghouse in selling nuclear fuel and related services.

Westinghouse retains a marketing advantage by virtue of the knowledge, experience and competence it has gained through long involvement and considerable investment in all aspects of the nuclear power generation industry. In particular Westinghouse has developed a unique understanding of the factors and parameters which are variable in the process of design of nuclear fuel and which do affect the in service performance of the fuel and its suitability for the purpose for which it was provided.

In all cases that purpose is to generate energy in a safe and efficient manner while enabling the operating nuclear generating station to meet all regulatory requirements affected by the core loading of nuclear fuel. Confidence in being able to accomplish this comes from the exercise of judgement based on experience, in the application of empirically derived models based on prior data and in the use of proven analytical models to simulate behavior of the fuel in normal operation and under hypothetical transients.

Thus, the essence of the competitive advantage in this field lies in an understanding of which analyses should be performed and in the methods and models used to perform these analyses. A substantial part of this competitive advantage will be lost if the competitors of Westinghouse are able to use the results of the analyses in the attached document to normalize or verify their own methods or models or if they are able to claim an equivalent understanding by demonstrating that they can arrive at the same or similar results. Its use by a competitor would reduce his expenditure of resources or improve his competitive position in the design and licensing of a similar product.

This information is a product of Westinghouse design technology. As such, it is broadly applicable to the sale and licensing of fuel in pressurized water reactors. The development of this information is the result of many years of Westinghouse effort and the expenditure of a considerable sum of money. While the analyses for this specific application were not unique, in order for competitors of Westinghouse to duplicate this information would require the investment of substantially the same amount of effort and expertise that Westinghouse possesses and which was acquired over a period of more than fifteen years and by the investment of millions of dollars. Over the years, this has included the development of heat transfer codes, nuclear analysis codes, transient analysis codes, core and system simulation methods and an experimental data base to support them.

Further the deponent sayeth not.

STATE OF FLORIDA)
) ss.
COUNTY OF DADE)

Robert E. Uhrig, being first duly sworn, deposes and says:

That he is Vice President of Florida Power & Light Company,
the Licensee herein;

That he has executed the foregoing document; that the statements made
in this document are true and correct to the best of his knowledge,
information, and belief, and that he is authorized to execute the
document on behalf of said Licensee.

Attachment 3 (Pages 1 - 4)

of the enclosed material is/xxx exempt from public disclosure in
accordance with Section 2.790 of the NRC "Rules of Practice", Title 10,
Code of Federal Regulations. Pursuant to section(s) (b)
this information is exempt from disclosure because Attachment 3 contains
privileged and confidential information.

Robert E. Uhrig

Subscribed and sworn to before me this

23 day of November, 19 81.

Cheryl L. Fredrick
