Dear Sir or Madam:

By letter dated March 23, 2016, Entergy Operations, Inc. (Entergy) submitted a license renewal application (Reference 1), which relies, in part, on results from calculations using the RAPTOR-M3G code for determining reactor vessel neutron fluence. In letter dated November 29, 2017 (Reference 2), Entergy submitted a license amendment request for approval for use of the RAPTOR-M3G code for performing reactor vessel neutron fluence calculations for Waterford Steam Electric Station, Unit 3.

Reference 2 also contains Attachment 3 which supplements the information in the License Renewal Application (Reference 1), as discussed during the presubmittal meeting held between the NRC and Entergy on October 19, 2017.

This letter is confirmation that Attachment 3 contained in Reference 2 is a supplement to the license renewal application (Reference 1).

This letter contains no new commitments.

If you have any questions or require additional information, please contact John Jarrell, Regulatory Assurance Manager, at 504-739-6685.

I declare under penalty of perjury that the foregoing is true and correct. Executed on November 28, 2017.

Sincerely,

JCD/ajh
