Office of Nuclear Reactor Regulation  
Attention: Mr. Steven A. Varga, Chief  
Operating Reactors Branch #1  
Division of Licensing  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Varga:

Re: Turkey Point Units 3 & 4  
Docket Nos. 50-250 and 50-251  
Containment Purge and Vent  
Valve Operability

In our letter L-82-291 dated July 14, 1982 we provided you with responses to three questions contained in your March 16, 1982 letter on the subject of containment purge and vent valve operability at Turkey Point Units 3 and 4. We also told you in that letter that the remaining unanswered question (No. 1) requires an analysis which was being performed by the valve manufacturer. We have been recently informed by the valve manufacturer that the analyses will not be completed until "early September". Based on that commitment, we plan to submit the response to question 1 to you on or before October 1, 1982. We are making every effort to expedite the completion of this effort.

Very truly yours,

Robert E. Uhrig  
Vice President  
Advanced Systems & Technology
