Office of Nuclear Reactor Regulation
Attention: Mr. Darrell G. Eisenhut, Director
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Eisenhut:

Re: Turkey Point Unit 4
Docket No. 50-251
Steam Generator Repair Project -
Special License Conditions

The Steam Generator Repair Program for Turkey Point Unit 4 is governed by the special conditions of DPR-41 in Section 3.H. Several of these conditions require the submittal of procedures or FPL plans for NRC review and approval. We have previously met these conditions for Turkey Point Unit 3 with the following submittals:

<u>Section</u>	<u>Subject</u>	<u>Submittal</u>
H(2)(f)	Preoperational Testing	L-81-535, dated December 23, 1981
H(2)(g)	Secondary Water Chemistry	L-81-508, dated December 2, 1981
H(2)(i)	Movement of Lower Assemblies	L-81-374, dated August 28, 1981

These activities will be basically identical for Unit 4 as described for Unit 3. Minor changes reflecting the experience of Unit 4 have been made, but these changes do not substantially alter the procedures or programs described above.

Therefore, we do not intend to re-submit these documents for Unit 4. The procedures covered above will be available for your review on site.

Very truly yours,

Robert E. Uhrig
Vice President
Advanced Systems & Technology
