Office of Nuclear Reactor Regulation  
Attention: Mr. Darrell T. Eisenhut, Director  
Division of Licensing  
U. S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Reference: (1) NRC Letter to Westinghouse Electric Corporation  
From Robert L. Tedesco (NRC) to T.M. Anderson (W),  
dated May 22, 1981.  
Subject: Acceptance for Referencing of Licensing  
of Topical Report WCAP-9500

Dear Mr. Eisenhut:

Re: Turkey Point Units 3 & 4 Docket No. 50-250 & 50-251  
Use of Optimized Fuel Assembly (OFA) at Turkey Point

This letter is to inform the Nuclear Regulatory Commission (NRC) of Florida Power and Light's (FPL) intent to utilize the Westinghouse 15 x 15 Optimized Fuel Assemblies (OFA's), in future refuelings at its Turkey Point Nuclear Units, commencing in the Fall of 1983, for Turkey Point Unit 3, Cycle 9.

Westinghouse Optimized Fuel Assembly design and methodology has been generically approved by the NRC (Reference 1) through its review of the Westinghouse Topical Report, WCAP-9500. The analyses for the Turkey Point reload are in process and will be performed in accordance with the methodology described in WCAP-9272, dated March 1978. The analyses will be completed early in 1983.

Very truly yours,

Robert E. Uhrig  
Vice President  
Advanced Systems & Technology
