Office of Nuclear Reactor Regulation  
Attention: Mr. Darrell G. Eisenhut, Director  
Division of Licensing  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Dear Mr. Eisenhut:

Re: Turkey Point Unit 3 & 4  
Docket No. 50-250-251  
Proposed License Amendment  
NUREG 0737 Technical Specifications

In accordance with 10 CRF 50.90, Florida Power and Light Company submits herewith three signed originals and forty copies of a request to amend Appendix A of Facility Operating License DPR 31 and 41.

This amendment is submitted in response to Generic Letter No. 82-16 which requested Technical Specifications for items required by NUREG-0737 for implementation by December 31, 1981.

Enclosure 1 to Generic Letter No. 82-16 listed eleven items to be addressed. The item and our position on each follows:

(1) STA Training (1.A.1.1.3)

Turkey Point Technical Specification 6.3.1 adequately addresses this requirement.

(2) Limit Overtime I.A.1.3

Our letter L-82-436, dated October 12, 1982 stated our position on the overtime restrictions of Generic Letter No. 82-12. In that letter we noted that our overtime restrictions are adequately enforced by incorporation in the Administrative Procedures and we believe amending the Technical Specifications is unnecessary based on our history of satisfactory results in this area.

(3) Short Term Auxiliary Feedwater System Evaluation (II.E.1.1)

(4) Safety Grade AFW System Initiation and Flow Initiation (II.E.1.2)

No action is required for items (3) and (4).

A046

8301040700 821229  
PDR ADDCK 05000250  
PDR

(5) Dedicated Hydrogen Penetrations (II.E.4.1)

Turkey Point Technical Specification 4.4.3 adequately addresses this item.

(6) Containment Pressure Setpoint (II.E.4.2.5)

The existing containment pressure setpoint was approved by the NRC per NUREG-0737 item II.E.4.2.5. Therefore, no action is required.

(7) Containment Purge Valve (II.E.4.2.6)

No action is required for this item.

(8) Radiation Signal on Purge Valves (II.E.4.2.7)

The requirement for the containment purge valves to close on high radiation is incorporated as proposed in Attachment 1 in the format of the Turkey Point Technical Specifications.

(9) Upgrade B & W AFW System (II.K.2.8)

(10) Not included.

(11) B & W Thermal - Mechanical Report (II.K.2.13)

No action is required for items (9), (10), and (11).

(12) Reporting Pressurizer Safety and Relief Valve Failures and Challenges (II.K.3.3.)

Turkey Point Units 3 & 4 is committed to reporting failures of pressurizer power operated relief valves or safety valves in our annual report. It is our position that control of this item is adequately addressed by administrative procedures and inclusion in the Technical Specifications is unwarranted.

The requirement to incorporate valve failures is described in Attachment 1.

(13) Anticipatory Reactor Trip on Turbine Trip (II.K.3.12)

The operating conditions for the instrumentation is adequately covered in Table 3.5-1.

The surveillance requirements for the Turbine Stop Valves are adequately covered in Table 4.1-2.

The surveillance requirements for the Auto-Stop Oil Pressure switches are added as described in Attachment 1 in the format of the Turkey Point Technical Specifications.

The Turbine Trip has been included as specified in Attachment 1.

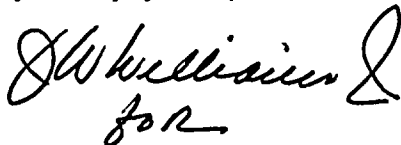

Office of Nuclear Reactor Regulation

Page 3

The proposed amendment has been reviewed by the Turkey Point Nuclear Safety Committee and the Florida Power and Light Company Nuclear Review Board.

In accordance with 10 CFR 170.22, it has been determined that this represents a Class I and Class III amendment and a check for payment will follow under separate cover.

Very truly yours,

A handwritten signature in cursive script, appearing to read "R. E. Uhrig", with a stylized flourish at the end.

Robert E. Uhrig  
Vice President  
Advanced Systems & Technology
