Mr. Harold R. Denton, Director  
Office of Nuclear Reactor Regulation  
U. S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Denton:

Re: Turkey Point Plant Units 3 and 4  
Docket Nos. 50-250 and 50-251  
FSAR Update

Florida Power & Light Company respectfully requests a 10 CFR 50.12 specific exemption of the schedular requirement in 10 CFR 50.71(e)(3)(i) to file our annual revision to the Final Safety Analysis Report (FSAR) on or before July 22, 1983: Our proposed FSAR filing date is November 22, 1983. The proposed schedule will facilitate an updated FSAR which would reflect a more as-built configuration of both Turkey Point nuclear units.

The required filing date of July 22, 1983 for the next FSAR update would not include the Steam Generator Repair outage modifications, i.e., Unit 4 Steam Generators Replacement, Auxiliary Feedwater modifications, NUREG 0737 (TMI) modifications, and other modifications currently undertaken during this outage.

The November 22, 1983 filing of the update would facilitate the incorporation of the above listed modifications made during the Steam Generator Repair outage and would reflect a more as-built configuration. Therefore, it is our opinion that an extension until November 22, 1983 to meet 10 CFR 50.71(e)(3)(i) is justified. Subsequent updates should be filed according to 10 CFR 50.71(e)(3)(i) requirements.

Very truly yours,

Robert E. Uhrig  
Vice President  
Advanced Systems and Technology
