## 26.2.c - Driver Fuel Composition for Minimum Burnup Core

```

c
c Driver fuel composition for the minimum burnup core
c
c material number: m1IJKL
c I = driver fuel element number (1 to 8)
c JKL = fuel material number (1 to 288)
c   1 = top layer, inner-most,   24 = top layer, outer-most
c   25 = 2nd from the top inner-most, 48 = 2nd from the top outer-most
c   Note: There are 24 radial and 12 axial material zones.
c   One axial material zone is divided into two numerical zones
c
c
c =====
c Fuel definition from ANL Fitted UALx HEU data November 2016
c 2016 minimum burnup core: Clean, 360 MWD

## 26.2.d - Driver Fuel Composition for Maximum Burnup Core

```

c
c Driver fuel composition for the maximum burnup core
c
c material number: m1IJKL
c I = driver fuel element number (1 to 8)
c JKL = fuel material number (1 to 288)
c   1 = top layer, inner-most,   24 = top layer, outer-most
c   25 = 2nd from the top inner-most, 48 = 2nd from the top outer-most
c   Note: There are 24 radial and 12 axial material zones.
c   One axial material zone is divided into two numerical zones
c
c =====
c Fuel definition from ANL Fitted UALx HEU data November 2016
c 2016 maximum burnup core: maximum burnup xenon, 675 MWD

## Supplement 27.1 – Beryllium Reflector Depletion Zones

The following are MCNP beryllium material libraries for a fresh (unirradiated), mid-cycle (4-year) and end-of-life (8-year) beryllium reflector. The material definitions for each point in the cycle are discrete for each of the 15 depletion zones.

### Material definition for FRESH (unirradiated) BERYLLIUM

## Supplement 28 – Control Blade Depletion Zones

An example of the depletion zones discretization for each control blade used in the MURR core MCNP model is depicted in Figure 28-1. Using these zones the correct depletion profile is captured for the particular runtime of each control blade in the limiting core configuration.

**Figure 28-1**

A list of control blade material composition for the limiting core predicted by the methodology developed in Reference 28-1.
