The diagram illustrates the experimental setup. A participant is seated at a table, looking at a video screen. A video camera is positioned above the screen to capture the participant's hand movements. A light source is located to the left of the screen. A target is marked on the screen. The participant's hand is positioned near the target. The setup is used to study the effects of target size and distance on movement time.

1. *Chlorophyll a* and *Chlorophyll b* were determined by the method of Lichtenthaler and Whistler (1972). The total chlorophyll content was determined by the method of Arar and Cook (1980). The carotenoid content was determined by the method of Lichtenthaler and Whistler (1972). The total carotenoid content was determined by the method of Arar and Cook (1980). The total protein content was determined by the method of Lowry et al. (1951). The total lipid content was determined by the method of Bligh and Dyer (1959). The total carbohydrate content was determined by the method of Dubois and Gilles (1950). The total nucleic acid content was determined by the method of Burton (1956). The total ash content was determined by the method of AOAC (1984). The total moisture content was determined by the method of AOAC (1984). The total dry matter content was determined by the method of AOAC (1984). The total organic acid content was determined by the method of AOAC (1984). The total alkaloid content was determined by the method of AOAC (1984). The total saponin content was determined by the method of AOAC (1984). The total tannin content was determined by the method of AOAC (1984). The total flavonoid content was determined by the method of AOAC (1984). The total phenolic content was determined by the method of AOAC (1984). The total terpenoid content was determined by the method of AOAC (1984). The total steroid content was determined by the method of AOAC (1984). The total glycoside content was determined by the method of AOAC (1984). The total alkaloid content was determined by the method of AOAC (1984). The total saponin content was determined by the method of AOAC (1984). The total tannin content was determined by the method of AOAC (1984). The total flavonoid content was determined by the method of AOAC (1984). The total phenolic content was determined by the method of AOAC (1984). The total terpenoid content was determined by the method of AOAC (1984).
