Office of Nuclear Reactor Regulation  
Attention: Mr. Lester S. Rubenstein  
PWR Project Directorate #2  
Division of PWR Licensing - A  
U. S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Rubenstein:

Re: Turkey Point Units 3 & 4  
Docket Nos. 50-250 & 50-251  
IE Bulletin 80-11  
TAC No. 42869 & 42870  
Masonry Wall Design Modifications

By letter dated January 4, 1985, NRC transmitted the Safety Evaluation and Technical Evaluation Report indicating the acceptability of the FPL safety-related masonry walls of Turkey Points Units 3 & 4. Your letter requested notification when all necessary modifications have been completed.

FPL letter L-85-207 dated May 31, 1985 notified the NRC that all masonry wall modifications are complete except for the battery room walls, and that the battery room walls would be worked in conjunction with the station battery replacement. The battery replacement was expected to be complete by December 1985. Due to the accelerated replacement of the 120 VAC inverters and delays in receipt of a replacement cell and new interconnecting bars, the final battery replacement will not be started until early 1986. Since the masonry wall replacement is contingent upon the battery replacement, FPL will keep the NRC Project Manager informed of our progress and report completion of this work.

Very truly yours,

  
C. O. Woody  
Group Vice President  
Nuclear Energy
