Office of Nuclear Reactor Regulation  
Attention: Mr. Lester S. Rubenstein, Director  
PWR Project Directorate #2  
Division of PWR Licensing - A  
U. S. Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Rubenstein:

Re: Turkey Point Units 3 and 4  
Docket Nos. 50-250 and 50-251  
Technical Specification Upgrade

Florida Power & Light Company (FPL) met with the NRC Staff in Bethesda, MD on March 18, 1986 to discuss our program to upgrade the Turkey Point Plant Technical Specifications to conform to the format and content of the Standard Technical Specifications for Westinghouse Pressurized Water Reactors, NUREG-0452. Specifically discussed were integration with ongoing efforts, the consideration of near-term improvements relating to industry/NRC efforts to improve technical specifications, limitations of the upgraded Technical Specifications, and procedures relating to licensing approval. FPL agreed to review the current schedule in view of the Items discussed, and if necessary provide a revised schedule, with supporting rationale and basis.

FPL has completed that review, and based on the following considerations will submit the upgraded Turkey Point Technical Specifications for NRC review by September 30, 1986.

We had previously stated in a letter dated January 31, 1986 (L-86-42) that the submittal would be made by July 31, 1986. Subsequent to that letter, the NRC issued Generic Letter 86-03, Applications for License Amendments, providing guidance on addressing the standards in 10 CFR 50.92 about the issue of no significant hazards considerations. FPL had prepared draft safety and no significant hazards determination evaluations using a Diablo Canyon technical specification upgrade submittal for guidance. These evaluations will be reviewed to ensure that the requirements of Generic letter 86-03 have been met. FPL expects to complete that review and any necessary revisions by mid-June. At the same time we will incorporate those near-term improvements which will improve the Technical Specifications and which can be supported on a Turkey Point Specific basis.

Mr. Lester S. Rubenstein, Director  
L-86-167  
Page Two

The schedule will then allow approximately 14 weeks for Plant Nuclear Safety Committee and Company Nuclear Review Board reviews. Due to the scope and complexity of the upgrade, this time is necessary in order to perform an adequate and thorough review, resolve comments, obtain review group approval and prepare the final document for submittal.

FPL can make a partial submittal prior to September 30, 1986 if required to support the NRC review. We do, however, prefer to make a single submittal. We will discuss this further with Mr. D. G. McDonald, if necessary.

If you have any questions regarding our schedule, please call us.

Very truly yours,

  
C. O. Woody  
Group Vice President  
Nuclear Energy
