Gentlemen:

Re: Turkey Point Units 3 and 4
Docket Nos. 50-250 and 50-251
Augmented Management on Shift Program

Paragraph V.D.2 of the NRC order regarding Turkey Point Units 3 and 4 dated October 19, 1987 requires FPL to provide a copy of the guidance document for the Management On Shift Program to the NRC. FPL has prepared Turkey Point Nuclear Plant Procedure 0-ADM-019, titled Management on Shift, to provide administrative instructions to management personnel on shift. The instructions delineate the on shift program, guidelines, standards, policy clarifications and reporting requirements. A copy of this procedure is attached in compliance with the requirements of the order.

The augmented management on shift program was initiated on Saturday, October 24, 1987 as previously committed. It is our judgement that the on shift program is in compliance with the requirements of the order. Accordingly, it is our understanding that there are no further order associated restrictions preventing the units from entering Mode 2 (startup) following the current maintenance outages. Please advise us if you do not concur with our understanding of the implementation requirements of the order.

Very truly yours,

C. O. Woody
Group Vice President
Nuclear Energy
