Section 5.4.1 of Appendix B of the Environmental Technical Specifications (ETS) for Turkey Point Units 3 and 4 require the submittal of a Non-Radiological Environmental Monitoring Report annually. Crocodile monitoring continued at the Turkey Point site during 1987. The monitoring program has shown the presence and dynamic nature of all size classes of animals on the site. Four nests were documented in 1987 with a total of 30 hatchlings being marked. One of the four nests was unsuccessful and the cause of the failure was determined to be due to small infertile eggs. It is felt that an immature female is attempting to nest but has not matured enough to produce viable eggs. Ten previous marked juvenile animals were captured and released on site. Growth rates of all recaptured animals was positive.

3. Section 5.4.1.5 - Records of Any Violations of the Environmental Technical Specifications.

No violations of the Appendix B Environmental Technical Specifications occurred during 1987.

4. Section 5.4.1.6 - Records of Changes As Described in Section 5.4.2.

No changes pursuant to Section 5.4.2 occurred in 1987.

Very truly yours,
