re: Information Notice #81-22 sect. 235

Oct. 31, 1988

Please be advised and receive this letter as official notification of the following detailed events at your licensee's (Florida Power & Light) Turkey Point Nuclear Plant.

Date: Oct. 27, 1988

Event: The plant manager (Jim Cross) of the Turkey Point Nuclear Plant at approximately 1300 hours at a meeting held in his office at the plant site, stated that "I dogged "QA" off - they're good at procedures etc. - not good at harassment charges."

Date: Oct. 31, 1988

Event: The Quality Assurance Department Head (J. Bladow) of the Turkey Point Nuclear Plant at approximately 1400 hours at a meeting held on the 2nd floor of the nuclear training facility, stated that the Turkey Point Nuclear Plant Site Vice President (John Odom) had stopped the internal investigation being done by his department concerning the allegations made to the federal agencies.

Although Mr. Bladow maintains that he reports directly to a corporate person at the Juno offices of Florida Power & Light, I submit that this individual has had an internal company investigation initiated by his department (Quality Assurance) interfered with and stopped at the direction of Turkey Point Nuclear Plant's (plant manager and site vice president) Jim Cross and John Odom respectfully. I submit that this is in fact a violation of the Amendment to the Atomic Energy Act of 1954 - United States NRC I&E Information Notice #81-22 section 235 dated 07/31/81 and applicable to NRC Region II.

210/

In addition, I further submit that this encroachment into the behavior and actions of the Quality Assurance Department of Turkey Point Nuclear by on site management deviates from the proper and correct methods of operation of the Quality Assurance Department. I further submit that I now have reason to believe that prior actions or decisions made by the Quality Assurance Department's personnel may have been influenced or mandated by on site management personnel as certainly one would have to now question the integrity of the entire Quality Assurance Department.

Furthermore, your licensee (Florida Power & Light) has contracted with and retained a legal firm from New Jersey (Stier, Anderson, Monroe) to investigate and report on the prior allegations forwarded to the NRC by Thomas Saporito. During a questioning session with these attorney's on Oct. 31, 1988, I learned that these attorney's enjoy a relationship with your licensee (Florida Power & Light) and therefore client/lawyer privilege. Additionally, they have met with and discussed the aforementioned allegations reported to the NRC with Mr. J. Bladow of the Turkey Point Nuclear plant's Quality Assurance Department and I therefore submit that their purpose is self serving to your licensee (Florida Power & Light) and in collusion with their (QA) department.

I request that your department utilize to the fullest extent, it's resources to investigate and resolve these issues as the Health and Safety of the Public relies on your departments enforcement of the law.

Regards:

Thomas J. Saporito, Jr.
