Office of Nuclear Reactor Regulation  
Attention: Mr. Steven A. Varga, Chief  
Operating Reactors Branch #1  
Division of Licensing  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Dear Mr. Varga:

Re: Turkey Point Units 3 & 4  
Docket Nos. 50-250 & 50-251  
Post-TMI Requirements  
Air Ejector Effluent Radiation Monitors

In our letter of February 28, 1983, we informed you that the air ejector effluent radiation monitor for Turkey Point Unit 3 would be shortly undergoing preoperational testing. The preoperational testing has been completed but was not successful. The modification made did not correct the moisture accumulation problem as had been expected. For this reason, the previously projected operability dates for the air ejector effluent radiation monitors of March 21, 1983 and September 15, 1983 for Units 3 and 4 respectively, will not be met. The initial review of the tests indicate that an in-depth evaluation of the system must be made. It is our intent to provide you with a report on our progress in addressing the moisture problem by June 1, 1983.

Very truly yours,

A handwritten signature in dark ink, appearing to read "Robert E. Uhrig", is written over the typed name.

Robert E. Uhrig
