1. The first group of people who are interested in the results of the study are the researchers themselves. They want to know if the study was successful in achieving its goals and if the data collected is reliable and valid. They also want to know if the study has contributed to the field of research and if it has provided any new insights or findings.

Office of Nuclear Reactor Regulation
Attention: Mr. Darrell G. Eisenhut, Director
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D. C. 20550

Dear Mr. Eisenhut:

Re: Turkey Point Units 3 & 4
Docket Nos. 50-250 & 50-251
Post-TMI Requirements:
Air Ejector Effluent Radiation Monitors
and Containment Hydrogen Monitors

Our letter L-83-208, dated March 31, 1983 requested relief from the operability dates for NUREG 0737 item II.F.1.2 (Air Ejector Effluent Monitor) and item II.F.1.6 (Containment Hydrogen Monitor) contained in your March 14, 1983 Order. Recent discussions with your staff have revealed the need for revised operability dates prior to amending the Order.

Both these items, however, represent a continuing source of problems, both in design and pre-operational testing. We have notified you of these difficulties previously and are currently actively pursuing resolution to these problems with the equipment vendors and our engineering department. When Unit 4 returns to power production following the Steam Generator Repair Outage, we will be able to direct even more effort into investigating potential solutions and problem resolution.

Therefore, we commit to an operability date for both item II.F.1.2 and II.F.1.6 of May 15, 1984, approximately one year following the end of Unit 4's outage. We wish to note, however, that this date is subject to the uncertainties of the design process, equipment procurement and potential pre-operative test problems

Very truly yours,

Robert E. Uhrig
Robert E. Uhrig
Vice President
Advanced Systems & Technology
