Office of Nuclear Reactor Regulations  
Attention: Mr. Darrell G. Eisenhut, Director  
Division of Licensing  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Eisenhut:

Re: Turkey Point Units 3 & 4  
Docket Nos. 50-250 & 50-251  
10 CFR 50 Appendix R  
Fire Protection

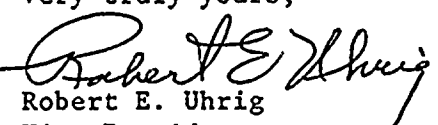

Revision 1 to the Turkey Point Units 3 & 4 Fire Protection report submitted April 8, 1983 is enclosed for your review. This revision was initiated at the request of your staff to provide more specific information on each exemption and to expand the justification for each exemption request. Editorial and typographical errors contained in the original report are also corrected in this revision.

Based on further evaluation of each fire area and discussions with your staff, it has been determined that exemption requests for Fire Areas/Zones D, E, 82, 87, 91 and 92 are not necessary. Appropriate changes to the April 8th report are incorporated by this revision. The total number of exemption requests is reduced to 36.

Because of the unique design of the Turkey Point Units 3 & 4, FPL considered it desirable to arrange a site visit for your staff reviewers. This visit will provide the opportunity for the staff members to develop a better understanding and appreciation of the fire protection features proposed and installed at Turkey Point. This meeting can be arranged at your convenience and should only require two day's time.

If you have any questions regarding the revision, please call.

Very truly yours,

  
Robert E. Uhrig  
Vice President  
Advanced Systems and Technology
