Figure 1. The effect of the concentration of the *Agrobacterium* suspension on the transformation efficiency of *Agrobacterium* strains. The *Agrobacterium* strains were grown in the YEA medium for 24 h at 28 °C. The cell concentration of the strains was adjusted to 10<sup>8</sup> cells/ml. The cell suspension was mixed with the plant tissue and incubated for 24 h at 28 °C. The plant tissue was then cultured on the selective medium. The transformation efficiency was determined as the number of transformants per 100 mg of plant tissue. The data are the mean ± SD of three independent experiments.

1. The first part of the document discusses the importance of maintaining accurate records of all transactions, particularly those involving cash payments. It emphasizes the need for transparency and accountability in financial reporting.

2. The second part outlines the procedures for handling discrepancies between recorded amounts and actual cash received. It provides guidelines for investigating such issues and resolving them promptly.

3. The third part addresses the role of internal controls in preventing fraud and ensuring the integrity of financial data. It highlights key areas where controls are most critical, such as authorization and segregation of duties.

4. Finally, the document concludes by stressing the ongoing nature of financial management and the importance of regular reviews and updates to policies and procedures.
