Office of Nuclear Reactor Regulation  
Attention: Mr. Darrell G. Eisenhut, Director  
Division of Licensing  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Dear Mr. Eisenhut:

RE: Turkey Point Units 3 and 4, St. Lucie Units 1 and 2  
Docket Nos. 50-250, 50-251, 50-335-50-389  
NRC/FPL Communications Interface

During the St. Lucie Unit 2 licensing phase, Florida Power & Light Company encouraged direct point to point communications between NRC staff reviewers and many FPL project and engineering personnel in order to rapidly process NRC questions. This process was further assisted by our temporarily establishing an FPL contact office in Bethesda. These efforts, combined with thoroughly committed Engineering, Project, and Construction organizations, and Operating organizations, helped FPL construct and license St. Lucie Unit No. 2 in record time.

Now that the St. Lucie Unit 2 construction licensing phase is over and the temporary FPL office in Bethesda is closed, we request that all telephone and telecopy communications be directed to the Nuclear Licensing Department via or in consort with the assigned NRC licensing project manager. The attached FPL Nuclear Licensing Contact list provides the appropriate St. Lucie Unit 2 primary and back-up contacts, as well as those for St. Lucie Unit 1 and Turkey Point Units 3 and 4. This centralized communications approach will help assure more accurate response scheduling and commitment tracking. All written communication from NRR should continue to be addressed to me with a copy to the appropriate plant managers. We appreciate your cooperation and assistance in this matter.

Since the attached Nuclear Licensing Contact list contains office and private residential telephone numbers, we request that the list be withheld from public disclosure.

Very truly yours,

Robert E. Uhrig  
Vice President  
Advanced Systems & Technology
