Office of Nuclear Reactor Regulation
Attention: Mr. S. A. Varga, Chief
Operating Reactors Branch #1
Division of Operating Reactors
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Varga:

Re: Turkey Point Units 3 & 4
Docket Nos. 50-250 and 50-251
SEISMIC QUALIFICATION OF THE AUXILIARY FEEDWATER SYSTEM

The following information was requested during a recent telephone conversation with your staff:

- The pressure switch to the turbine trip valve has been deleted because of the new high pressure turbines installed in the system.
- The nitrogen backup for the air system is seismic Class I.
- For Unit 4, the branch lines from the suction side of the Auxiliary Feedwater pumps have been deleted. Those same lines for Unit 3 should be deleted during the Unit 3 Cycle 9 refueling outage. The only branch line on the discharge side of the pumps are the pump re-circulation lines, which are seismic Class I lines.

Very truly yours,

Robert E. Uhrig
Vice President
Advanced Systems & Technology

REU/SAV/lmg
