L-83-548

Office of Nuclear Reactor Regulation  
Attention: Mr. Darrell G. Eisenhut, Director  
Division of Licensing  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

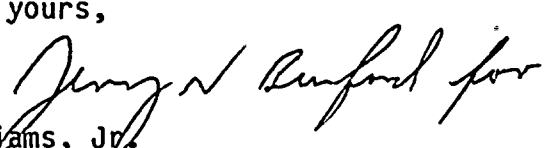

Dear Mr. Eisenhut:

Re: Turkey Point Unit 4  
Docket No. 50-251  
Pressure Vessel Material Fracture Toughness  
(NUREG-0744 Rev. 1)

NUREG-0744, Rev. 1 outlines an acceptable method of fracture mechanics analysis to be performed to demonstrate the existence of adequate margin when the fracture toughness requirements of Appendix G to 10 CFR 50 are not met. Our letter L-83-55, dated February 3, 1983 discussed our intent to submit such an analysis by early November 1983.

The analysis has been initiated and is well underway. However, we were forced to utilize generic fracture-mechanics data due to the lack of plant specific information. Recently we have become aware of the existence of Turkey Point plant specific data and are finalizing arrangements to obtain it. In view of the fact that there are considerable benefits to be gained by the use of such plant specific information, we now intend to postpone completion of the analysis until we receive the new data. We now plan on a submittal date of May 1, 1984.

Very truly yours,

  
J. W. Williams, Jr.  
Vice President  
Nuclear Energy Department

JWW/JEM/js
