Office of Nuclear Reactor Regulation
Attention: Mr. Darrell G. Eisenhut, Director
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Eisenhut:

Re: Turkey Point Units 3 & 4
Docket No. 50-250, 50-251
Inservice Inspection Exemption Request

Florida Power & Light requests on exemption from the schedular requirements of 10CFR 50.55a(g)(5)(ii) for the period of one month.

10CFR 50.55a(g)(5)(ii) requires that if a revised Inservice Inspection (ISI) Program conflicts with the technical specifications for the facility, the licensee shall apply to the NRC for a technical specification amendment to conform the technical specifications to the revised program. The amendment request is required to be submitted six months prior to the start of the period during which the provisions become applicable.

Our letter, L-83-524, dated October 21, 1983, established the beginning of the second ten year interval as September 1, 1984 for both Turkey Point units. Our original schedule was to submit the required technical specification amendment request, with the Second Ten Year ISI Summary by March 1, 1984 in compliance with 10CFR 50.55a(g)(5)(ii). Because of recent revisions to code boundary drawings, additional time to review and incorporate these changes is required prior to submittal of the revised program. In order to incorporate these changes and additional revisions to the inservice testing technical specifications, we will not be able to submit the revised program and associated technical specification amendment request until April 1, 1984.

This delay will not affect the implementation of the new ISI program which is still scheduled for the beginning of the second ten year interval on September 1, 1984.

1/0

Because this exemption will not affect the actual implementation of the program, we have determined that approval of this exemption request would not endanger life or property or the common defense and security and would not be contrary to the public interest. This request, therefore, complies with the requirements of 10CFR 50.12 (Specific exemptions) and should be approved.

Should you or your staff have any questions on this request, please contact us.

Very truly yours,

J.W. Williams, Jr.
