The following information was obtained from the records of the
 Department of the Interior, Bureau of Land Management, for the
 period from January 1, 1900, to December 31, 1909.
 The records show that the total area of land in the
 State of California, which was surveyed and
 patented to the United States, was 1,111,111
 acres.

of which 1,000,000 acres were patented to the
 United States.

The following table shows the number of acres of
 land surveyed and patented to the United States, by
 county, for the period from January 1, 1900, to
 December 31, 1909.

County	Acres	Number of Sections	Number of Townships	Number of Ranges
Alameda	1,111,111	1,111	111	11
Albany	1,111,111	1,111	111	11
Alameda	1,111,111	1,111	111	11

Office of Nuclear Reactor Regulation
Attention: Mr. Darrell G. Eisenhut, Director
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Eisenhut:

Re: Turkey Point Units 3 and 4
Docket Nos. 50-250 and 50-251
Revisions to Inservice Test
Program for Pumps and Valves

The attached document is a revision to the current Turkey Point Unit Nos. 3 & 4 Inservice Test Program (IST) for Pumps and Valves. This revision includes Florida Power & Light's responses to questions and comments in the NRC letter dated September 20, 1983 and discussions between NRC staff and FPL representatives.

Revisions to the program include:

1. Combined Program

The two existing Turkey Point Unit Nos. 3 & 4 IST programs were combined into a single IST program covering both units, except for the IST program interval end dates.

2. Plant Changes and Modifications

The revised IST Program includes valves that were added to systems, replaced with a different type of valve body or actuator, or removed from the IST program as the result of plant changes and modifications.

3. Revised Tables

Tables Nos. I and II in the current IST programs were combined into revised Table I. A new Table II was added to address Reactor Coolant System Pressure Isolation Valves. Table I.A. was revised to provide additional information requested by the NRC staff.

4. Updated ASME Code Addenda

The applicable ASME Code and Addenda was updated to include the 1980 Edition through Winter 1981 addenda for consistency with the revised Inservice Inspection program.

Should you or your staff have any questions on this information, please contact us.

Very truly yours,

J. W. Williams, Jr.
