Washington, D.C. 20555-0001

To Whom It May Concern:

Enclosed is the final After Action Report/Improvement Plan for the Calvert Cliffs Nuclear Power Plant (CCNPP) Ingestion Pathway Exercise that was held from September 12-14, 2017 in the State of Maryland.

There were no Level 1 Findings, two Level 2 Findings which were successfully re-demonstrated, and three Planning Issues identified during the Exercise.

Based on the results of the exercise and a review of the offsite radiological emergency response plans and procedures submitted, FEMA Region III has determined they are adequate (meet the planning and preparedness standards of NUREG-0654/FEMA-REP-1, Revision 1, November 1980, as referenced in 44 CFR 350.5 and there is reasonable assurance they can be implemented, as demonstrated during this exercise.

If you have any questions, please contact Thomas Scardino at (215) 931-5546.

Sincerely,

MaryAnn Tierney
Regional Administrator
