Office of Nuclear Reactor Regulation
Attention: Mr. Darrell G. Eisenhower, Director
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Eisenhower:

Re: Turkey Point Units 3 and 4
Docket Nos. 50-250 and 50-251
Proposed License Amendment
Containment Integrity

In accordance with 10 CFR 50.90, Florida Power & Light Company submits herewith three signed originals and forty copies of a request to amend Appendix A of Facility Operating License DPR-31 and 41.

This amendment is submitted to comply with the FPL commitment to revise the technical specifications to allow breaching containment integrity of an operating unit in order to test the containment atmosphere sampling section of the Post Accident Sampling System. Administrative Controls would be required to control this activity. To increase the clarity of this and other associated specifications, a format similar to Revision 5 (draft) of the Standard Technical Specification (STS) has been used.

The proposed amendment is described below and shown on the accompanying Technical Specification pages.

Pages i and v

The table of contents are updated.

Page 1-2

The definition of containment integrity is revised to be consistent with the STS.

Acc'd
1/1

Mr. Darrell G. Eisenhut

Page 2

Page 1-3, 1-9, Table 1-1

The definition of OPERATIONAL MODES is included in place of current definitions of plant operating conditions to be consistent with the STS.

Page 1-4

The definition of CORE ALTERATIONS is substituted for refueling operations to be consistent with the STS.

Page 3.0-1

This section is revised to be consistent with the STS. The STS paragraphs 3.0.1 and 3.0.3 have been reversed for better consistency with the unchanged portions of the Technical Specifications.

Page 3.3.1 and 3.3-2

The specifications for Containment Integrity, Internal Pressure and Containment Airlocks are revised to the STS revision. An exception concerning testing of valves is provided with the Containment Integrity specification. This exception is consistent with the note to STS Table 3.6-1. The containment isolation valve specification is revised in format only.

Page 3.10-1, 3.10-2, 3.10-3, and 3.10-4

The refueling operations specifications are revised to be consistent with the STS. The instrumentation and radiation monitoring specifications are changed in format only.

Page 3.4-3

This page is revised in format only as a result of other changes.

Page 3.12-1

The reference concerning HEAVY LOADS is revised to be consistent with the change to specification 3.10.9.

Bases 3.0-1, 3.0-2, 3.3-1, 3.10-1, and 3.10-2

The bases are revised to be consistent with the above changes.

A no significant hazards statement in support of these changes is attached.

In accordance with 10 CFR 170.21, attached is a check for the \$150.00 application.

In accordance with 10 CFR 50.91 (b) (I), a copy of the proposed amendment is being forwarded to the state designee for the State of Florida.
