U.S. Nuclear Regulatory Commission Public Meeting Summary

Title: Notice of Forthcoming Meeting Between the U.S. Nuclear Regulatory Commission and Tennessee Valley Authority to Discuss Topics Associated With TVA's Early Site Permit Application for the Clinch River Nuclear Site

Meeting Identifier: 20170464, ADAMS accession number: ML17097A447, supporting document (Topics for Discussion) ADAMS accession number: ML17145A337

Date of Meeting: Tuesday, May 30, 2017

Location: Two White Flint North (TWFN) and via teleconference

Type of Meeting: Category 1

Purpose of the Meeting:

10 CFR 52.17(a) requires the application to contain a site safety analysis report which includes 1) a description of the quality assurance program applied to site-related activities (per 52.17(a)(1)(xi)) and 2) an evaluation of the site against applicable sections of the Standard Review Plan revision in effect 6 months before the docket date of the application (per 52.17(a)(1)(xii)). TVA has provided its Operational Quality Assurance Program description which is based on ANSI N45.2-1971 as part of its application. The purpose of the public meeting is to discuss how the Operational Quality Assurance Program description meets the requirements of 52.17(a)(1)(xi) and (xii).

Summary of Meeting

The meeting started with brief introductions and identification of the callers, and an NRC overview of the meeting purpose and how the meeting discussion would be documented.

NRC staff stated that it is finalizing multiple draft RAs to help it determine how TVA's Operational Quality Assurance Program description in Rev. 0 of the application meets the requirements of 52.17(a)(1)(xi) and (xii). NRC noted that as an alternative to responding to multiple RAs, TVA could update the SSAR in its next application revision (Rev. 1) and provide supporting documentation to demonstrate how the Operational Quality Assurance Program description meets the requirements of 52.17(a)(1)(xi) and (xii).

Action Items/Next Steps:

TVA stated that it plans to update Rev. 0 of the SSAR and provide supporting documentation that demonstrates how the Operational Quality Assurance Program description meets the requirements of 52.17(a)(1)(xi) and (xii) in its next revision (Rev. 1) of the application. Although TVA will not submit Rev. 1 of the application until the first quarter of FY18 (October – December 2017), it plans to provide a letter on the docket within 30 days outlining its approach to updating the SSAR and the supporting documentation it intends to provide.

NRC participants: Kerri Kavanagh, Allen Fetter, Nicholas Savvoir, Taylor Lamb

TVA attendees: Ray Schiele, Dan Stout, Peter Hastings, Kevin Casey, Archana Manoharan

Public participants: None
