Office of Nuclear Reactor Regulation
Attention: Mr. Steven A. Varga, Chief
Operating Reactors Branch #1
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Varga:

Re: Turkey Point Units 3 & 4
Docket Nos. 50-250 & 50-251
Generic Letter (GL) 84-15, Proposed
Staff Actions to Improve and
Maintain Diesel Generator Reliability
NRC TAC Nos. 55915 & 55916

In a March 25, 1985 letter to you, and in an April 22, 1985 response to I&E Inspection Report 250/251-85-02, Finding I, we stated that we would submit revised emergency diesel generator (EDG) technical specifications for the Turkey Point Plant by May 1, 1985. That submittal was deferred pending issuance of revised EDG technical specifications for Virginia Electric and Power Company's North Anna Plant, which were recently approved.

We are reviewing the North Anna EDG technical specifications in conjunction with the Generic Letter 84-15 model technical specifications, and plan to submit revised EDG technical specifications for the Turkey Point Plant by August 1, 1985.

Yours very truly,

J. W. Williams, Jr.
Group Vice President
Nuclear Energy
