Office of Nuclear Reactor Regulation
Attention: Mr. Hugh R. Thompson, Director
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Thompson:

Re: Turkey Point Units 3 and 4
Docket Nos. 50-250 and 50-251
Generic Letter No. 83-28, Section 2.2.2

Florida Power & Light Company has reviewed that portion of your April 4, 1985, letter regarding Generic Letter 83-28, Section 2.2.2 implementation at Turkey Point Units 3 and 4.

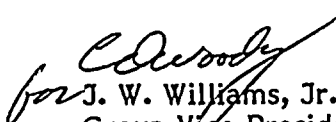

Your attention is requested to our letter L-84-290 dated October 19, 1984. This letter describes the implementation of the NUTAC report at Turkey Point and we feel provides the information requested in the April 4 request.

Regarding the adequacy of the NUTAC program to address the concerns on vendor interface, it is our position and that of the industry that the Vendor Equipment Technical Information Program (VETIP), as defined in the March 1984 NUTAC document, is adequate.

FPL has implemented the program as described in our October 19, 1984 letter. Accordingly, we request that the staff reconsider the request for additional information.

Should you have any questions on this information, please contact us.

Very truly yours,

J. W. Williams, Jr.
Group Vice President
Nuclear Energy
