NOVEMBER 28 1986

L-86-475

Office of Nuclear Reactor Regulation
 Attention: Mr. D. G. McDonald, Project Manager
 PWR Project Directorate #2
 Division of PWR Licensing - A
 U. S. Nuclear Regulatory Commission
 Washington, D. C. 20555

Dear Mr. McDonald:

Re: Turkey Point Units 3 and 4
 Docket Nos. 50-250 and 50-251
 Proposed License Amendment
Upgrade of Technical Specifications

By letter dated September 29, 1986 (L-86-393) Florida Power & Light Company (FPL) submitted a request to amend Appendix A of Facility Operating Licenses DPR 31 and DPR 41 to upgrade the current plant Technical Specifications and include, within limitations, the guidance of NUREG-0452, Standard Technical Specifications for Westinghouse Pressurized Water Reactors. As agreed to at the November 18, 1986 meeting with the NRC Staff, the September 29, 1986 submittal shall be considered a draft document. Once agreement is reached on the technical content, FPL will resubmit it's request to amend the Turkey Point Units 3 and 4 Operating Licenses.

Attached are proposed specifications and supporting documentation for the Electrical Power Systems, which were not included in our September 29 submittal. Also attached are replacement no significant hazards evaluations for Technical Specifications 2.2.1 and 3/4.1.1.1, and instructions for insertion of this update into the previous submittal. As discussed with you, 20 copies of the proposed specifications are being submitted to support your review.

The attached Electrical Power Systems Technical Specifications have been reviewed by the Turkey Point Plant Nuclear Safety Committee and the FPL Company Nuclear Review Board.
