FEBRUARY 20 1987

L-87-81

U. S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, D. C. 20555

Gentlemen:

Re: Turkey Point Units 3 and 4
Docket Nos. 50-250 and 50-251
Proposed License Amendment
Reactor Vessel Level Monitoring System
NRC TAC Nos. 62072 and 62073

By letter dated July 18, 1986 (L-86-296), Florida Power & Light Company (FPL) submitted a request to amend Appendix A of Facility Operating Licenses DPR-31 and DPR-41 to incorporate plant specific technical specifications for the Reactor Vessel Level Monitoring System.

Your letter of December 5, 1986 requested that we modify our submittal such that Action Statement 9 (Table 3.5-5) would require restoration of the system (both channels) to operable status prior to restart from the scheduled refueling outage. We have revised our submittal in accordance with your request. The attached technical specification pages supersede the same pages included with our July 18, 1986 letter. The conclusions reached in the Safety and No Significant Hazards Evaluation remain unchanged. This revision has been reviewed by the Turkey Point Plant Nuclear Safety Committee and the FPL Company Nuclear Review Board.

If there are any questions, please call us.

Very truly yours,

C. O. Woody
Group Vice President
Nuclear Energy
