Gentlemen:

Re: Turkey Point Units 3 and 4
Docket Nos. 50-250 and 50-251
Special Report - Breached Fire Barriers

In accordance with Technical Specification 6.9.3 the attached Special Report is provided for your information.

Should there be any questions on this information, please contact us.

Very truly yours,

C. O. Woody
Group Vice President
Nuclear Energy

The diagram illustrates a two-stage sampling process. At the top, a large circle is labeled 'N'. Inside this circle is a smaller circle labeled 'n'. Inside the 'n' circle is a small circle labeled 'm'. Arrows indicate the flow of the process: from 'N' to 'n', and from 'n' to 'm'. Below the circles, the text 'Stage 1' is written, and below that, 'Stage 2' is written. The text 'Sample of size n' is written below 'Stage 1', and 'Subsample of size m' is written below 'Stage 2'.

Q

SPECIAL REPORT

MARCH 6, 1987

FIRE BARRIERS BREACHED FOR LONGER THAN SEVEN DAYS

Purpose:

Technical Specification 3.14.5.b requires the submission of a report to the NRC if a non-functional fire barrier penetration is not returned to functional status within 7 days. In accordance with the above requirement, this special report on the breached barriers is being generated in order to notify the NRC. This report will be updated on a 30 day basis until the Appendix R associated work is complete.

Event:

The plant has been and is continuing to implement numerous modifications, mainly in accordance with Appendix R Alternate Shutdown requirements. The scheduler exemptions for the Safe Shutdown modifications, which outlined the alternative compensatory measures to be taken when a barrier is breached, expired on September 30, 1986, and on October 1, 1986. Upon the expiration of the exemptions, the compensatory measures as described in Attachment 1 of our letter L-85-386 (dated October 11, 1985), are continuing to be in place until the Safe Shutdown modifications are complete. Breaches incurred during Alternate Shutdown modifications are governed by the Technical Specifications or the exemptions, as applicable.

Cause and Corrective Actions:

The major cause of the breached barriers is the Appendix R Alternate Shutdown work which remains to be completed. Due to the large volume of work being performed, the plant is reporting the breaches in this one report, rather than on a case-by-case basis. The breaches reported this month are breaches which are either open or closed, but were open for longer than 7 days (see attached list of breached barriers).

The plant continues to implement the compensatory measures as applicable.
