CENTER FOR NUCLEAR RESPONSIBILITY

7210 Red Road • Suite 217 • Miami, Florida 33143 • 661-2165

March 30, 1987

Daniel G. McDonald
Senior Project Manager
PWR Project Directorate #2
Division of PWR Licensing-A
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Dan McDonald,

I am writing to on behalf of myself and the Center for Nuclear Responsibility. On March 24, 1987, I had a conversation with John Hopkins of your staff and advised him of my desire to be kept informed on the recent events and investigation of events at Turkey Point nuclear unit #4. I explained to Mr. Hopkins that our organization is very interested in monitoring the repair process and perhaps becoming more involved. I also advised him that since it takes months for NRC documentation to get to the Public Document Room, that we are requesting that we be placed on the service list to receive any and all NRC and/or FPL and/or vendor documents having to do with the corrosion of the vessel studs and head. We would, of course, also wish to receive any and all NRC inspection reports as they are released.

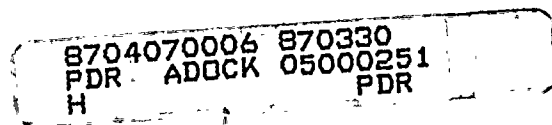

In short, we request that the NRC place the Center for Nuclear Responsibility on the service list to receive any and all documents about the recent problems at Turkey Point Unit #4, including, but not limited to: FPL safety evaluations, environmental assessments, and administrative requests; NRC technical reports, inspection reports, and all correspondence; any technical evaluations by reactor vendors.

Also, we would appreciate your letting us know by phone the day FPL files their 50.59 request or any similar administrative document.

Please let us know as soon as possible if you can accomodate our requests, or if we will need to institute some sort of administrative action to obtain the documentation that we need.

Sincerely,

Joette Lorion
Joette Lorion
Director

Figure 1 consists of five sub-graphs labeled (a) through (e), each showing the percentage of correct responses (Y-axis, 0 to 100) over time (X-axis, 0 to 10 seconds). The graphs show a rapid initial increase in correct responses, followed by a plateau. The plateau level is higher for higher initial correct percentages.

Time (s)	(a) 100% correct	(b) 90% correct	(c) 80% correct	(d) 70% correct	(e) 60% correct

Figure 1 is a schematic representation of the experimental design. It consists of four panels arranged horizontally. Each panel shows a subject in a car, viewed from the side, looking forward at a road. In the road, there is a car ahead of the subject. The panels illustrate different stages or conditions of the experiment, such as the subject's position relative to the car ahead or the timing of a signal.
