TOTAL NUMBER OF COPIES REQUIRED: LTTR 18 ENCL 15

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that proper record-keeping is essential for the company's financial health and for providing reliable information to stakeholders.

2. The second part of the document outlines the specific procedures for recording transactions. It details the steps involved in the accounting process, from identifying a transaction to recording it in the appropriate ledger.

3. The third part of the document discusses the importance of reconciling accounts. It explains how regular reconciliations help to ensure that the company's records are accurate and up-to-date.

4. The fourth part of the document discusses the importance of maintaining proper documentation. It emphasizes that all transactions should be supported by appropriate evidence, such as invoices and receipts.

5. The fifth part of the document discusses the importance of reviewing and auditing the company's records. It explains how regular reviews and audits help to identify any errors or discrepancies and to ensure that the company's records are accurate and reliable.

Washington, D. C. 20555

Gentlemen:

Re: Turkey Point Units 3 and 4  
Docket Nos. 50-250 and 50-251  
Proposed License Amendment  
Auxiliary Feedwater System

By letter dated May 7, 1986 (L-86-193), and supplemented on February 20, 1987 (L-87-79), Florida Power & Light Company (FPL) submitted a request to amend Appendix A of Facility Operating Licenses DPR-31 and DPR-41 to provide individual specifications for the auxiliary feedwater (AFW) system and condensate storage tank, and to correct errors in valve numbers in Table 3.16-1. The attached pages include additional changes, and supersede the same numbered pages previously submitted.

The AFW System Limiting Condition for Operation (LCO) and Action Statement 3 were modified to clarify their intent by referring to Action Statement 4 in the LCO, and referring to Action Statements 1 and 2 in Action Statement 3. Action Statements 1 and 2 are controlling if the operability of two independent AFW trains is not verified within the four hours. Table 3.18-1, Note 1 was modified by adding "(but not both)" to clarify the steam admission valve alignment to restore train operability. Also, the action statement for condensate storage tanks and AFW system technical specifications were modified by adding "at least" prior to "HOT STANDBY" where applicable to be consistent with Standard Technical Specification wording.

These changes have been reviewed by the Turkey Point Plant Nuclear Safety Committee and the FPL Company Nuclear Review Board. The Safety and No Significant Hazards Consideration Evaluation included with our February 20, 1987 submittal is not affected by these changes.

If there are any questions regarding this submittal, please contact us.

Very truly yours,

  
C. O. Woody  
Group Vice President  
Nuclear Energy
