U. S. Nuclear Regulatory Commission  
Attention: Document Control Desk  
Washington, D.C. 20555

Gentlemen:

Re: Turkey Point Unit 4  
Docket No. 50-251  
IAEA Safeguards Program

This letter is to provide you with the information required by the International Atomic Energy Agency (IAEA) to allow the IAEA to schedule their next inspection at Turkey Point Unit 4.

The IAEA has notified the NRC that they would like all future communications to be formally transmitted in writing, whenever possible. The NRC has made the same request for formal documentation from FPL relative to communications concerning the IAEA. FPL is aware that the IAEA will need to seal the reactor head, missile shields, and containment equipment hatch prior to making the Unit 4 reactor critical. To minimize the impact on the Turkey Point Unit 4 return to power, the following schedule is provided for the IAEA to plan their inspection.

May 6 Reactor head re-installed and available for IAEA surveillance seals.  
May 21 Equipment hatch closed and available to the IAEA.  
May 24 Reactor missile shields set and available to the IAEA.  
May 25 Reactor will be made critical.

At this time, only the reactor head re-installation has been completed, and the remaining dates could be subject to change due to changing plant conditions. We will notify you as changes to the above schedule are made.

As you are aware, the only IAEA surveillance system currently in place inside containment is one box containing two cameras. With the reactor head re-installation complete, FPL requests that the IAEA backup the camera surveillance with seals on the reactor head as soon as possible. This will provide a backup if the camera surveillance system should fail. FPL will support any inspection scheduled to install these seals.

Also, Mr. V. A. Kaminskas has replaced Mr. R. Mende as Reactor Supervisor, and will now be the IAEA contact at Turkey Point. His phone number is (305) 246-6090.

Thank you for your cooperation.

Very truly yours,

  
C. O. Woody  
Group Vice President  
Nuclear Energy

The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes the need for transparency and accountability in the financial management of the organization.

The second part of the document outlines the specific procedures and controls that will be implemented to ensure the integrity of the financial data.

The third part of the document provides a detailed overview of the proposed budget for the upcoming fiscal year.

The fourth part of the document discusses the potential risks and challenges associated with the proposed financial strategy and offers recommendations for mitigation.

The fifth part of the document concludes with a summary of the key findings and a call to action for the management team.

The document is intended to provide a comprehensive overview of the financial management process and to serve as a reference for all stakeholders involved in the organization's financial operations.
