Gentlemen:

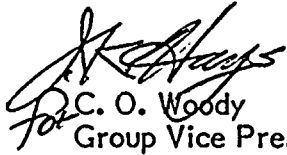

Re: Turkey Point Units 3 and 4
Docket Nos. 50-250 and 50-251
Control Room Habitability

By letter dated February 2, 1987 the NRC issued Amendment No. 121 to Facility Operating License No. DPR-31 and Amendment No. 115 to Facility Operating License No. DPR-41 for Turkey Point Units 3 and 4, respectively. These amendments modified the Technical Specification 3.4.7, Control Room Ventilation, Limiting Condition for Operation (LCO) to allow a one-time additional 45 day LCO to permit implementation of modifications required to satisfy NUREG-0737 Item III.D.3.4, Control Room Habitability requirements. In our application dated August 25, 1986 we stated that work on the modifications would begin within 90 days of the implementation date specified in the license amendment.

Because of the extended Unit 3 and 4 outages, and to reduce the amount of congestion and interference in the control room during unit startup, the work will not begin by July 2, 1987 as originally intended. As discussed with Mr. D. G. McDonald, NRC Project Manager for the Turkey Point Plant, implementation of the required modifications will begin after both units return to power. This work is scheduled in the Integrated Schedule for the Turkey Point Plant which is being reviewed by the NRC Staff. FPL will keep Mr. McDonald and Mr. D. R. Brewer, the Senior Resident Inspector, informed of the progress of these modifications.

If there are any questions, please call us.

Very truly yours,

D.C. O. Woody
Group Vice President
Nuclear Energy
