L-88-269

U. S. Nuclear Regulatory Commission  
Attn: Document Control Desk  
Washington, D. C. 20555

Gentlemen:

Re: Turkey Point Units 3 and 4  
Docket Nos. 50-250 and 50-251  
Emergency Power System (EPS)  
Enhancement Project

Letter L-88-221, dated May 27, 1988, provided Florida Power & Light's (FPL) proposed schedule for the Emergency Power System (EPS) enhancement project.

Pursuant to that schedule FP&L is pleased to provide the enclosed EPS enhancement report. The report provides preliminary information about the proposed electrical power enhancements which FPL will install at the Turkey Point facility. This document along with the Testing and Safety Evaluation documents will provide the information necessary to support issuance of the Safety Evaluation Report (SER) for this modification.

As discussed with Dr. G. Edison, Project Manager, NRC, FPL will meet at your convenience to discuss the proposed enhancements.

Should you have any questions, please contact us.

Very truly yours,

  
W. F. Conway  
Senior Vice President - Nuclear
