The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry must be clearly documented, including the date, amount, and purpose of the transaction. This ensures transparency and allows for easy verification of the data.

In the second section, the author outlines the various methods used to collect and analyze the data. These methods include direct observation, interviews with key personnel, and the use of specialized software tools. Each method is described in detail, highlighting its strengths and limitations.

The third part of the document presents the results of the data analysis. It shows that there is a significant correlation between the variables studied, which supports the hypothesis that was initially proposed. The data also reveals some unexpected trends that warrant further investigation.

Finally, the document concludes with a series of recommendations based on the findings. It suggests that certain processes should be revised to improve efficiency and accuracy. Additionally, it recommends that future research should focus on exploring the underlying causes of the observed trends.

OCTOBER 20 1988

U. S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, D. C. 20555

Gentlemen:

Re: Turkey Point Units 3 and 4
Docket Nos. 50-250 and 50-251
Electrical Power System Enhancement
Application Fee

By our letter L-88-221 dated May 27, 1988, Florida Power & Light Company (FPL) requested the Office of Nuclear Reactor Regulation to review in three parts, submittals involving electrical power system enhancements. In that submittal FPL did not provide the application fee of \$150.00. Please find attached FPL Check No. 9493 as remittance for the application fee for the Electrical Power System Enhancement Project.

Very truly yours,

W. F. Conway
