Gentlemen:

Re: Turkey Point Units 3 and 4
Docket No. 50-250 and 50-251
Safety-Related Motor-Operated Valve Testing and
Surveillance - Generic Letter 89-10

By letter L-89-467 dated December 28, 1989, Florida Power and Light (FPL) provided its initial response to Generic Letter (GL) 89-10, and its acceptance of the recommendations and scheduler requirements provided in the Generic Letter. A commitment was made to provide details of our implementation plans by June, 1990

Prior to the June 13, 1990, issuance of Supplement 1 to GL 89-10, all MOVs subject to the expanded requirements had been identified for both Turkey Point Units. This list is currently under review to ensure compliance with the guidance provided in Supplement 1, and will be amended as necessary. Completion of this review is scheduled for December, 1990.

Design basis review of these valves and their switch settings in accordance with the recommendations made in the Generic Letter is in progress. Completion of these activities is scheduled to occur by June, 1991, pending resolution of related industry research and initiatives currently underway.

All other recommendations promulgated in the Generic Letter are currently under review. Programs which implement these recommendations will be in place in accordance with the specified schedule guidance.

Should you have any questions on this information, please contact us.

Very truly yours,

K. M. Harris
