Gentlemen:

Re: St. Lucie Units 1 and 2  
Docket Nos. 50-335 and 50-389  
Turkey Point Units 3 and 4  
Docket Nos. 50-250 and 50-251  
Generic Letter No. 90-03, Relaxation  
of Staff Position in Generic Letter  
83-28, Item 2.2 Part 2 "Vendor Interface  
for Safety-Related Components"

NRC Generic Letter No. 90-03, Relaxation of Staff Position in Generic Letter 83-28, Item 2.2 Part 2 "Vendor Interface for Safety-Related Components", issued March 20, 1990, provided the elements that the NRC staff has concluded should be contained in a vendor interface program for safety-related components. Florida Power and Light Company's response to the recommendations in GL 90-03 for St. Lucie Units 1 and 2 and Turkey Point Units 3 and 4 is attached.

Should there be any questions, please contact us.

Very truly yours,

W. H. Bohlke  
Vice President  
Nuclear Engineering and Licensing

### Response to Generic Letter 90-03

Generic Letter 90-03 identifies two specific areas requiring response. To summarize, the NRC staff concluded that an adequate vendor interface program should include:

- a. A program with the NSSS vendor as described in VETIP, which covers all safety-related components within the NSSS scope of supply. This program should include provisions for assuring receipt by the licensee/applicant of all technical information provided by the NSSS vendor.

#### Response:

Florida Power and Light Company (FPL) actively participated in the Nuclear Utility Task Action Committee (NUTAC) on Generic Letter 83-28, "Required Actions Based on Generic Implications of Salem ATWS Events" Section 2.2.2 for the specific purpose of defining an appropriate vendor interface program. A result of the NUTAC efforts was the development of the Vendor Equipment Technical Information Program (VETIP) as described in Institute of Nuclear Power Operations (INPO) Report 84-10, issued in March 1984. The FPL program for safety-related components within the NSSS scope of supply is in line with the VETIP as developed by NUTAC.

The FPL program includes an established NSSS Vendor Interface Program (Combustion Engineering for St. Lucie Units 1 and 2, Westinghouse for Turkey Point Units 3 and 4) which assures that the most current NSSS vendor information is provided to FPL in information bulletins. FPL provides feedback to the NSSS vendor in the form of a signed receipt for technical information received in these bulletins.

- b. A program of periodic contact with vendors of other key safety-related components not included in (a) above.

#### Response:

FPL is establishing a program to assure that vendors of "other key safety-related components" are contacted on a periodic basis. Vendors of the Diesel Generators, Auxiliary Feedwater Pumps, Safety-Related Batteries, Inverters and Battery Chargers, Essential Component Cooling Water Pumps, Safety-Related Electrical Switchgear and Safety-Related Non-Manual Valve Operators are considered "other key safety-related component" vendors. This program will consist of periodic direct mailings with additional mailings and/or phone calls until a response is received or all reasonable means of contact prove unsuccessful. The contacts will be documented and filed for future reference. This program will be in place by January 1, 1991.
