Gentlemen:

Re: Turkey Point Units 3 and 4
Docket Nos. 50-250 and 50-251
Area Radiation Monitoring System

Florida Power and Light submitted a plan to meet Regulatory Guide 1.97 by letters L-84-20, dated January 16, 1984 and L-85-176A, dated May 10, 1985. One of the commitments made as part of the plan to meet the requirements of Regulatory Guide 1.97 is the installation of a new Area Radiation Monitoring System (ARMS). Letters L-86-329, dated August 15, 1986, L-86-509, dated December 31, 1986 and L-88-290 dated July 21, 1988, provided a schedule to install a new, separate, non-qualified ARMS by December 31, 1990 (Mod 341 of the Turkey Point Integrated Schedule).

The purpose of this letter is to inform you of a change on the committed schedule for installation of the new ARMS as discussed with Dr. Gordon Edison, NRC Turkey Point Project Manager. The change in schedule is necessary due to equipment delivery delays. The ARMS upgrade will be completed prior to entry into Mode 6 at the end of the upcoming dual unit outage. The dual unit outage is currently scheduled to start on November 25, 1990 with the shutdown of Unit 4. The schedule change will have no impact on plant operations since the units will be defueled until entering Mode 6.

Should there be any questions, please contact us.

Very truly yours,

K. N. Harris
Vice President
Turkey Point Nuclear Plant
