Gentlemen:

Re: Turkey Point Units 3 and 4
Docket Nos. 50-250 and 50-251
Proposed License Amendments
Organizational Titles and PNSC Composition

By letter L-92-136, dated May 19, 1992, Florida Power and Light Company (FPL) submitted a request to amend the Turkey Point Technical Specifications. In response to a discussion between FPL and the staff on June 23, 1992, a revision to the description of the amendments request and Insert (A) of the Proposed Technical Specifications is submitted. The original description of the amendments request (Attachment 1 of L-92-136) and Insert (A) of Attachment 3 of L-92-136 are superseded in their entirety.

Should there be any questions, please contact us.

Very truly yours,

T. F. Plunkett
Vice President
Turkey Point Nuclear

DESCRIPTION OF AMENDMENTS REQUEST

The proposed amendment revises Specification 6.0, "Administrative Controls", of the Turkey Point Units 3 and 4 Technical Specifications to (a) reflect the present organizational titles, (b) delete specific title designations for the Plant Nuclear Safety Committee (PNSC), while at the same time not altering the required composition for areas of expertise, representation by management, or the quorum and (c) correct typographical errors. A description of these changes is provided below.

General Organizational Titles

As a result of a Florida Power and Light Company (FPL) Nuclear Division reorganization, organizational titles have been changed without altering the individuals' responsibilities. The proposed changes are as follows:

- o Change the reference from "Plant Manager - Nuclear" or "Plant Manager" to "Plant General Manager",
- o Change the reference from "Operations Superintendent" to "Operations Manager",
- o Change the reference from "Site Services Manager - Nuclear" to "Services Manager",
- o Change the reference from "health physics manager" to "Health Physics Supervisor",
- o Change the reference from "Plant Supervisor Nuclear" or "Plant Supervisor - Nuclear" to "Nuclear Plant Supervisor", and
- o Change the reference from "Training Superintendent" to "Training Manager".

These titles are clearly identified at the plant to a specific individual(s), with specific work accountabilities and assignments. Each individual shall meet or exceed the minimum qualification requirements as specified in Technical Specification 6.3, Facility Staff Qualifications.

In Specification 6.2.2, the wording "applicable department superintendent" is changed to "applicable department manager", since the title of "superintendent" has been eliminated and the title of "manager" substituted.

In Table 6.2-1, the abbreviation "PSN" should be changed to "NPS" to ensure consistency with the revised definition specified in Table 6.2-1 and the change in organizational title from "Plant Supervisor Nuclear" to "Nuclear Plant Supervisor."

ATTACHMENT TO L-92-208 (CONT.)

FPL Topical Quality Assurance Report (FPLTQAR 1-76A) was revised to reflect the organizational title definitions. Section 1.0 (TQR 1.0) of FPLTQAR 1-76A discusses FPL's organizational structure. Organizational relationships and responsibilities will continue to be described in detail in FPL Topical Quality Assurance Report. Appendix B of 10 CFR 50 and 10 CFR 50.54 (a) (3) govern changes to the organizations described in the Topical Quality Assurance Report. Changes to this program description which reduce commitments previously accepted by the USNRC will require USNRC approval prior to implementation.

Composition of Plant Nuclear Safety Committee

Specification 6.5.1.2 lists by title the members of the Plant Nuclear Safety Committee (PNSC). This list requires a revision each time an organizational change occurs or when the titles of PNSC members are changed.

The proposed change eliminates the specific reference to an organizational title, and substitutes the composition of the PNSC to be representative of plant management from multi-plant disciplines. These disciplines include Operations, Maintenance, Health Physics, Reactor Engineering, Services, Technical Support, Licensing, Quality Assurance/Control, and Instrument and Control.

The PNSC member shall meet the requirements as described in Sections 4.2, 4.3, or 4.4 of the ANSI N-18.1-1971, Selection and Training of Nuclear Power Plant Personnel.

Specification 6.5.1.6, Responsibilities, is not impacted by this change.

This amendment request is similar to a license amendment approved for Nebraska Public Power District Cooper Plant.

Typographical Errors

In Specification 6.9.1.3, the entire word "Offsite Dose Calculation Manual" should be capitalized, to ensure consistency within Technical Specifications Section 6.0 and the Definitions of Section 1.0.

In Specification 6.10.3 o., the wording "Annual Radiological Environmental Monitoring Report(s)" should be changed to "Annual Radiological Environmental Operating Report(s)", to ensure consistency with Specification 6.9.1.3.

In Specification 6.2.1 e., the letters "h" and "p" in the title "health physics" should be capitalized to ensure consistency with Specification Section 6.3.2.
